1. Background and development strategy of Guiyang (城市背景和发展战略)

Guiyang City, the capital of Guizhou Province, is located in the west of Yungui Plateau, with an area of 8034 km² and a population of 3.5 million (in 2007).

Guiyang has developed rapidly in the last few years, promoting social progress; concurrently, its population has expanded rapidly.

As a result of it, there are many problems needing to be urgently resolved, focusing on the sustainable development of economy, society and environment aspects.

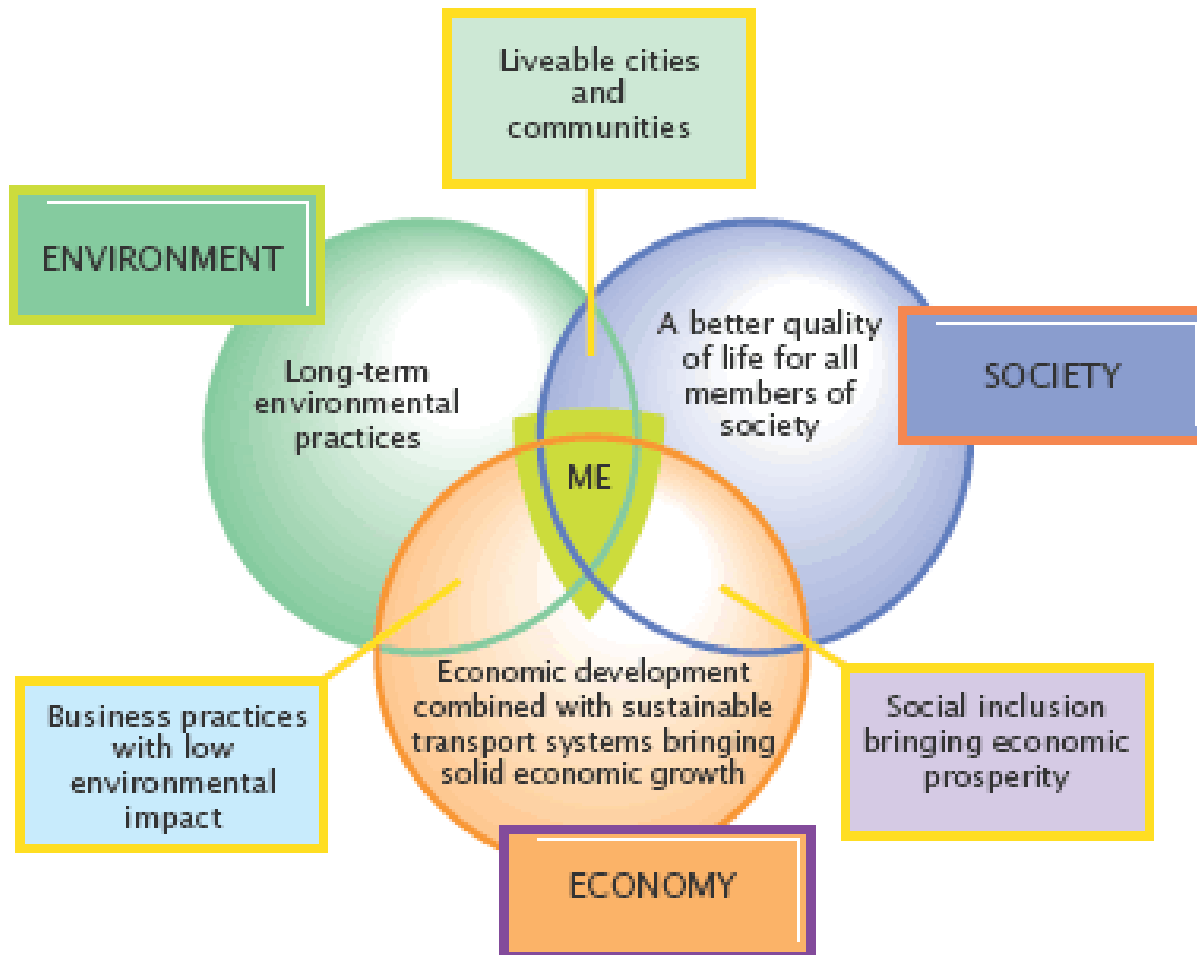

So how can we develop the economy, and protect the environment and promoting social harmony at the same time?

We kept exploring and trying during the development of reforms, then Guiyang proposed constructing ecological-economy city in the future and making it as our development strategy.

建设生态经济城市- 可持续发展战略

Ecological Culture City – Sustainable City

2. Guiyang CDIA project background

(项目背景)

参加在马尼拉举行的会议

Participating the "Invest in Asia's Urban Future" conference

Experts From CDIA to Assess projects of Guiyang

2. Guiyang CDIA project background

(项目背景)

In Feb. 2007, invited by UN-Habitat, Guiyang participated in the Manila conference to establish CDIA. Learning that the CDIA will support implementation of projects that benefit society and environment, Guiyang DRC seriously considered it, and thought that applying to join CDIA will assist us in promoting construction of our ecological-culture city, and enhancing communication and cooperation with international organizations which means a lot for Guiyang.

3. Selecting projects process (挑选项目)

In order to get approval of CDIA, Guiyang Municipal government conducted meetings with the participation of many related departments, like Environment Protection Bureau, Circle economy office, Investment Attracting Bureau, Construction Bureau, Urban Administration Bureau, Agriculture Bureau and Forest Construction Bureau, etc.

3. Selecting projects process (挑选项目)

During the meetings, we discussed to propose some well-prepared urban infrastructure projects focusing on environmental protection, ecological agriculture and old city renovation. And these projects should have the function of greatly promoting development of society and environment, and also needed the technical, funding support of international organizations.

4. Signed the cooperation agreement and identify the content of cooperation(签订合作协议，确定项目合作内容)

From March 7th to 13th, 2008, CDIA assessment team spent a one week site-visit in Guiyang to assess potential projects in Guiyang. Two projects were agreed to get support, they are a water resource project and an urban public transportation project. On May 27th of 2008, Guiyang signed a formal agreement with CDIA. Through implementing the technical support, we want to prove if the project is feasible or not, and help our project meet the funding requirement of international financing organizations.

6. Guiyang Inputs (项目保障工作)

- Establish Guiyang CDIA steering committee to implement cross-sector cooperation. The committee leader is the mayor of Guiyang, members of it are related sector chiefs. The group plays a role to organize and coordinate work of the Project.
- Guiyang CDIA office is located in Guiyang DRC, and employs special professional staff to be responsible for the detailed daily work.
- The office director is the director of the Guiyang DRC, and the vice director is the General Manager of Economy sections in Guiyang DRC. They will be responsible for regularly holding workshops to report and exchange information of the projects.

7. Internal Implementation of the TA for Guiyang CDIA project (实施技援工作)

Phase	content	Time
Phase I	conduct project start-up meeting with related sectors and make a work plan and identify the detailed responsibilities in the project	1day
Phase II	Study the ways of Localizing the CDIA inputs, collect necessary materials and translate it for the PFS inputs	1 month
Phase III	Organize the material and compile the draft of PFS	20 days
Phase IV	revise and improve the PFS and submit final report to CDIA	10 days
