PROPONENTS		Geography and Population	
Ministry of Public Works and Transport H.E Vong Pisith, Deputy Director General Corner Norodom Blvd/Street 106, Phnom Penh, Cambodia Phone: 855 23 427 845	Ministry of Industry & Handcraft H.E Ek Sonn Chan, Secretary of State 45 Preah Norodom Boulevard, Khan Daud Penh, Phnom Penh, Cambodia Phone: 855-23-211141 Fax: 855-23-428263	Area: 57.49 km² Population: 318,676 <p>The Kingdom of Cambodia is located in the southern portion of the Indochina Peninsular in Southeast Asia. The country faces numerous socio-economical challenges with a low per capita income compared to its most neighboring countries. Nevertheless, Cambodia has one of the fastest growing economies in Asia.</p>	 
Supporting Local Governments <i>Battambang; Kampong Cham; Siem Reap; Sihanoukville; Taing Krasaing</i>	Other Partners Asian Development Bank (ADB) Agence Française de Développement (AFD)	KEY CITY DEVELOPMENT ISSUES	
Investment in the urban water and sanitation sector has centered primarily on its capital Phnom Penh and, as a result, infrastructure and institutional development in provincial towns has suffered from inadequate levels of investment. Urban water supply and urban sanitation services in Cambodia are delivered in an uncoordinated and financially unviable manner countrywide. The Asian Development Bank (ADB) and the Agence Française de Développement (AFD) are engaged in supporting the Government of Cambodia to address the core problem of inadequate water supply and sanitation infrastructure and services. The Provincial Water Supply and Sanitation Project (PWSSP) is proposed to improve and to expand water supply and sanitation coverage in selected towns.		Intervention Areas <small>Source of Maps: Wikipedia.org</small>	
DETAILS OF COOPERATION		 <p>Existing Waste Water Treatment Plan</p>  <p>Site observation on water stream</p>	
CDIA supported activities include: a) Rapid assessment of Cambodian towns to confirm final list of towns selected for the PWSSP b) Review and assist in the update of long and medium term development plans for the sector and preparation of a 20-year roadmap for increasing urban water supply and sanitation coverage c) Undertake technical feasibility studies and assist the executing agency (EATo evaluate and prioritize subproject towns d) Prepare preliminary engineering designs for priority subprojects e) Prepare a procurement capacity assessment for the executing and implementing agencies plus sample bidding documents f) Prepare detailed implementation and procurement arrangements			
EXPECTED DEVELOPMENTAL IMPACTS		EXPECTED INVESTMENT FOLLOW UP	
<ul style="list-style-type: none"> - Selected provincial towns will benefit from improved operation and financial performance in provisions of sustainable water supply & sanitation services - Increase in water supply coverage will benefit all residents in these provincial towns, particularly the poor population - Health risks of the residents in the selected town will decrease from improvement in sanitation service provision - Project preparation, implementation and operation and maintenance capacity will be enhanced to complement ongoing institutional development and capacity building 		Est. infrastructure investment value	60 mil US\$
