PROPONENTS		Geography and Population	
Guiyang city Guizhou province, China P.R.		<b>Area: 8,034 km<sup>2</sup></b> <b>Population: 4,324,561</b> Guiyang is the capital of Guizhou Province. The city is located in the central part of the province on the east of the Yunghu Plateau, and on the north bank of the Nanming River at an elevation of 1100 meters above sea level. Aside from coal, Guiyang has large deposits of bauxite and is a major producer of aluminum.	
<b>Central State Partner</b> Guizhou Provincial Development & Reorm Commission Guizhou Provincial Finance Bureau		<b>Other Partners</b>	
KEY CITY DEVELOPMENT ISSUES			
<p>Before the year of 2007, there was no systematic Vocational Trainings in Guiyang city. Guiyang is in urgent need to improve the condition of educational services, in particular the vocational education services. The biggest problems that GVTC is facing on the improvement of those educational services includes:</p> <ol style="list-style-type: none"> <li>1) Vocational education quality and investment is not adequate.</li> <li>2) Education facilities and conditions are poor.</li> <li>3) Inadequate training capacity.</li> </ol> <p>Teaching staff are insufficient with most of them having academic profile. Also, the technical trainings provided could not keep up with technology and practices in the actual industry.</p>
